

10/065,147  
Amdt. Dated Mar. 26, 2004  
Resp. to Off. Action dated Mar. 22, 2004

## AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0032] with the following amended paragraph:

As shown in FIGS. 1-8, an iron golf club head of the present invention is generally designated 20. The club head 20 is preferably composed of three main components: a periphery member 22, a central member 24 and a face plate 26. The club head 20 can range from a 1-iron to a lob-wedge, with the loft angle preferably ranging from fifteen degrees to sixty degrees. The three main components are assembled into the club head 20 using a process such as disclosed in co-pending U.S. Patent Application 10/065,150, 10/\_\_\_\_, filed on an even date herewith, entitled Method For Manufacturing Iron Golf Club Head, which is hereby incorporated in its entirety by reference.
